PROPOSED NEW BOARD POLICY FOR FIRST READING

616 Textbook Policy

This Textbook Policy establishes minimum system-wide guidelines and goals aimed at addressing the cost of college textbooks and other instructional materials and at ensuring compliance with Section 133 of the federal Higher Education Opportunity Act (HEOA) of 2008.

Each institution in the IHL system shall establish a written policy that includes the following provisions. In this policy, the term textbook is meant to include various types of course materials, including software, electronic files, supplemental materials, and course packs.

1. Textbook Adoption Deadlines – Each institution shall establish firm deadlines and procedures for the adoption of textbooks for upcoming semesters. These deadlines and procedures shall be set to enable the institution to fully comply with the HEOA of 2008, including the requirement that textbook information (including ISBN and prices) be provided to students at the time of registration.

Requirements:

- Institutions shall establish adoption deadlines that are no later than the beginning of the registration period for succeeding semesters and that provide sufficient time to work with affiliated bookstores to meet the HEOA posting requirements. Additionally, these adoption deadlines shall be at least 40 days prior to the end of the preceding semester, whenever possible, as dictated by registration schedules.

- The adoption process will include the indication of whether a textbook is required or recommended and should include to the extent possible an indication of whether an alternate (e.g., earlier) edition of the textbook may be used. Timely adoption of textbooks is required for the following course types: lecture, lecture/lab, laboratory, and recitation/discussion. These course types, as designated and defined by the IHL Data Dictionary, are generally assumed to be courses with textbook requirements. Any other courses which at individual institutions historically require textbooks shall be included in the individual institution’s adoption policy.

- Department chairs/heads will be responsible for ensuring that all pertinent courses under their authority have adoptions submitted by the deadline, even in instances where no instructor has been assigned for a course section as of the announced adoption deadline date.

- Departments shall be strongly encouraged to adopt the same course materials for all sections of each course.
2. **Minimum Adoption Periods** - Each institution shall establish guidelines that promote a minimum adoption period for textbooks. In this section, textbook refers specifically to a book that is resalable, as opposed to one-time usage materials (e.g., workbooks) or books that have limited resale value.

- Institutions shall set guidelines for a minimum three-year adoption period for lower division courses. These guidelines may include reasonable exceptions to this requirement for instances when editions go out of print, when substantive changes are made in either the course description or the textbook, or when there is a significant change in the body of knowledge pertinent to the course. Procedures for the authorization of exceptions should include approval at the dean level, after recommendation from a department chair/head.

- Guidelines shall encourage a minimum textbook adoption period of at least two years for upper division courses. However, it is recognized that, to provide current scholarship in a global marketplace, upper division courses will have more advanced and changing content, that students often wish to build a personal library of books in their major, and that there is a more limited potential for establishing a favorable local buy-back market for such upper division textbooks. Because of these factors, institutional policy will balance the benefits of a minimum adoption period with the selection of the best available textbook.

3. **Dissemination of Textbook Information** – Institutions shall be responsible for providing information on best practices in textbook adoptions to faculty and for providing advice to students on ways to save money on textbook purchases.

- The institutions or affiliated bookstores shall provide faculty with information and tools for the selection of textbooks, including pricing information and the availability of alternative formats for course materials (e.g., whether textbooks are available in electronic versions) and of separately available components of a bundled textbook;

- The institutions or affiliated bookstores shall provide students with tips on purchasing textbooks, including the availability of electronic versions, the availability of unbundled textbook components, buy-back and exchange policies, and price-matching policies. Institutions shall provide this information, including an explanation of the significance of ISBNs, to entering freshmen during orientations or within 30 days prior to the beginning of the fall semester.

- The institutions or affiliated bookstores shall provide faculty and students with results from surveys of student satisfaction with textbooks.

4. **Assessment of Progress** – Institutions shall develop procedures to assess the success of the above practices in containing the costs of textbooks.

- Assessment strategies shall include: the inclusion of questions on student surveys (e.g., course evaluations) about the value of assigned
textbooks; production of reports of the extent of compliance of each institution with the adoption deadlines; information about the costs of the textbooks for the top twenty (highest enrollment) courses; the volume of buy-back purchases at the affiliated bookstores; the number of electronic versions of textbooks being used; and surveys (student and faculty) of the ability of the affiliated bookstore to provide adequate stocking of books.

- The institutional executive officer of each institution will name a textbook coordinator who will be responsible for the implementation and administration of this policy.

- Annually, the textbook coordinator will submit such assessment information as required by the assessment plan as an annual assessment report to the Commissioner or his/her designee.

- The annual assessment report will be made available on the website of the subject institution, as well as on the System website.
